TOOLKIT AND SKILLS

Software Development

HTML, CSS, JavaScript, React, Node.js, SQL

Automation & Data

VBA Automation, Quantitative Data Analysis

Tools & Infrastructure

Git, GitHub Pages, Cloudflare

Personal and Technological Profile

Financial Analyst and Full-Stack Developer passionate about automation and process optimization. Specializes in transforming complex problems into smart automated solutions. Experienced in streamlining workflows by 50% through automated data ingestion, automation tools, and Web apps. Possesses strong self-learning abilities and an AI-Native mindset.

Professional Experience

Analyst, Goren Family Office, Tel Aviv - Yafo

2025 - Present

- **Web App Development:** Built a dedicated HTML/CSS/JS tool used by analysts for common financial calculations, significantly streamlining team workflows. ([View Calculators](#))
- **Automation & Data Processing:** Designed automated data ingestion and data processing systems, leading to a 50% reduction in monthly workload and improved accuracy.
- **Financial Systems Analysis:** Performed complex quantitative comparisons between portfolio managers and hedge funds using advanced data structures.

Founder & Lecturer, Digital Investment Course

2023 - Present

- **Product Management:** Established and managed a Udemy investment course with ~10,000 students and a 4.7/5 ★ rating, simplifying complex concepts. ([View Course](#))
- **Web Infrastructure:** Maintained the course homepage, migrating from WordPress to a static site on GitHub Pages distributed via Cloudflare. ([Visit Dividendream](#))
- **Ongoing Data Analysis:** Managed an active investment portfolio and presented monthly data-driven updates to demonstrate core market principles.

Education

Full-Stack Development, Technion - Continuing Education

2025 - Present

- **Technological Training:** Intensive 320-hour program covering client/server-side development, databases, JavaScript, Node.js, SQL, and Git.
- **Project: Math Ninja:** Developed 'Math Ninja' – an interactive multiplication practice game based on full client-side logic. ([View Project](#))
- **Project: Deep Analysis:** Developed a React-based Web system for analyzing and visualizing stock data, featuring an interactive user interface. ([View Project](#))
- **S&P 500 Tracker Project:** Full-Stack dashboard (Angular, Python, MongoDB) for market data analysis, deployed on Render. ([View S&P 500 Tracker Project](#))

M.A. in Philosophy, Tel Aviv University

2020 - 2025

- **Research & Logical Analysis:** Specialized in analyzing complex logical systems.
- **Conference Presentation:** Presented in-depth academic research at an official conference under the title 'Death as a Motive for Life'. ([Watch on YouTube](#))

B.A. in Philosophy, The Hebrew University of Jerusalem

2015 - 2018

- **Analytical Foundation:** Focused on formal logic and Greek philosophy.

Military Service

Defense Instructor, Israeli Air Force

2012 - 2014

- **Instruction & Leadership:** Executed professional training and instructed commanders and soldiers for emergency situations in dynamic environments.
