Personal and Technological Profile

Investment analyst with a technological background, specializing in complex data analysis, automation, and streamlining organizational workflows. Experienced in developing dedicated tools and building data solutions that combine business understanding with technology. Possesses analytical thinking and a passion for the capital markets.

Professional Experience

Analyst, Goren Family Office, Tel Aviv - Yafo

2025 - Present

Web App Development: Built a dedicated HTML/CSS/JS tool used by analysts for common financial calculations, significantly streamlining team workflows. [\(Link\)](#)

Automation & Data Processing: Designed automated data ingestion and data processing systems, leading to a 50% reduction in monthly workload and improved accuracy.

Investment Operations Manager, WM Family Office, Herzliya

2024 - 2025

Automation & Development (VBA): Built complex automation tools to improve workflows and data accuracy, using VBA to streamline financial reporting.

Portfolio Architecture: Analyzed companies and built customized stock portfolio models with a focus on asset optimization.

Founder & Lecturer, Digital Investment Course

2023 - Present

Product Management: Established and managed a Udemy investment course with ~10,000 students and a 4.7/5 ★ rating, simplifying complex concepts. [\(Link\)](#)

Web Infrastructure: Maintained the course homepage, migrating from WordPress to a static site on GitHub Pages distributed via Cloudflare. [\(Link\)](#)

Education

Full-Stack Development, Technion - Continuing Education

2025 - 2026

Practical Training: Comprehensive 320-hour Full-Stack, database, and system architecture training.

MomentuMatrix Project: Algorithmic trading bot (React, Python) connected to Interactive Brokers API, managed via Neon PostgreSQL and deployed on AWS. [\(Link\)](#)

Deep Analysis Project: React-based web application for stock data analysis and visualization, featuring an interactive user interface for data-driven insights. [\(Link\)](#)

Math Ninja: Interactive React web application designed for practicing and mastering multiplication, powered by a Node.js backend and deployed on Render. [\(Link\)](#)

Portfolio Management, BDO

2020 - 2022

Professional Licensing: Passed all Israel Securities Authority exams.

M.A. in Philosophy, Tel Aviv University

2020 - 2025

Research & Logical Analysis: Specialized in analyzing complex logical systems, a skill directly applicable to software architecture and algorithmic problem-solving.

Conference Presentation: Presented academic research on 'Death as a Motive for Life' at an official conference. [\(Link\)](#)

B.A. in Philosophy, The Hebrew University of Jerusalem

2015 - 2018

Analytical Foundation: Focused on formal logic and Greek philosophy, providing an analytical foundation for programming and data structures.

Military Service

Defense Instructor, Israeli Air Force

2012 - 2014

Instruction & Leadership: Executed professional training and instructed commanders and soldiers for emergency situations in dynamic environments.
